

Installation de Sysmon sur les machines Windows

Par l'équipe Nixie SAE 5C03

1/ Récupération des assets

Une fois nos VM Windows installées, nous allons pouvoir mettre en place le système de journalisation d'évènements Syslog. Pour cela, nous allons utiliser le Set de Règles très performant SwiftOnSecurity.

Ainsi, nous allons commencer par télécharger Sysmon sur une des machines Windows. Pour cela on se rends à l'adresse <https://learn.microsoft.com/en-us/sysinternals/downloads/sysmon>.

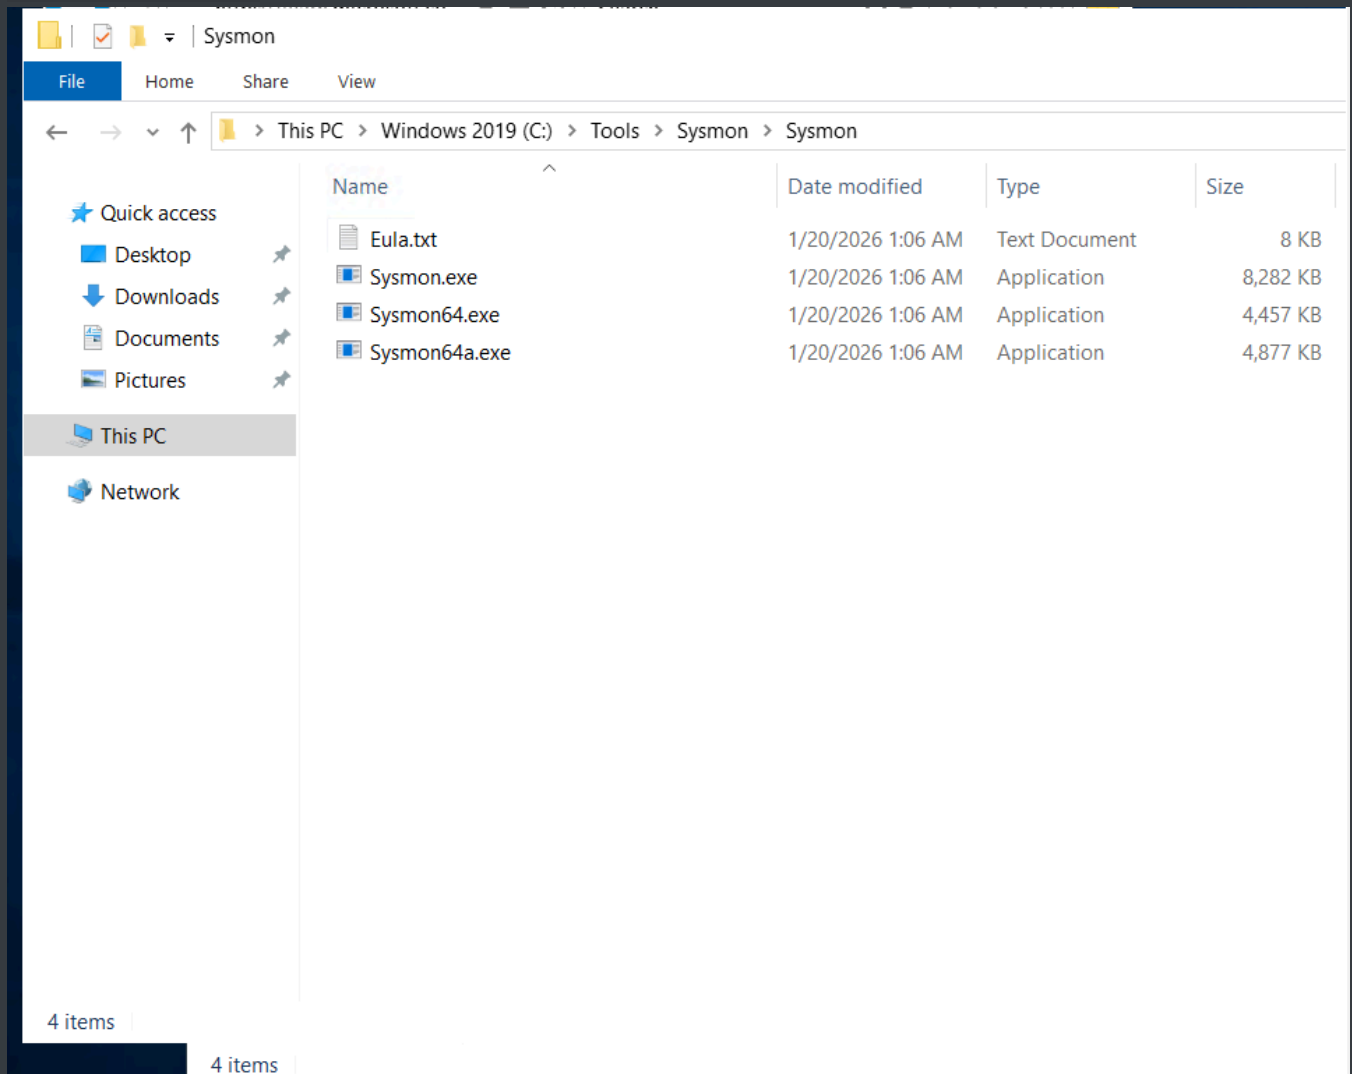

The screenshot shows a Microsoft Internet Explorer browser window. The address bar displays the URL <https://learn.microsoft.co...>. The page content includes a message about browser support, a download button for Microsoft Edge, and a section for Sysmon v15.15. A red arrow points to the 'Download Sysmon (4.6 MB)' link.

 [Download Sysmon \(4.6 MB\)](#)
[Download Sysmon for Linux \(GitHub\)](#)
Introduction

On télécharge donc le software. Ensuite, on le Unzip dans un dossier temporaire

C:\Tools\Sysmon :

Après nous allons récupérer la configuration Sysmon de SwiftOnSecurity. Pour cela on se rends à <https://github.com/SwiftOnSecurity/sysmon-config/blob/master/sysmonconfig-export.xml> et on download la Raw File :

The screenshot shows a web browser window with multiple tabs. The active tab is 'SwiftOnSecurity'. The address bar shows the URL <https://github.com/SwiftOnSecurity/sysmon-config/blob/master/sysmonconfig-export.xml>. The page content shows the 'sysmon-config' repository with a pull request #151. The file 'sysmonconfig-export.xml' is selected, showing 1200 lines (1120 loc) and 120 KB. The file content is displayed in a code editor. A red arrow points to the 'Raw' button in the file toolbar, which is used to download the raw file.

SwiftOnSecurity Merge pull request #151 from Neo23x0/patch-8 1836897 · 5 years ago

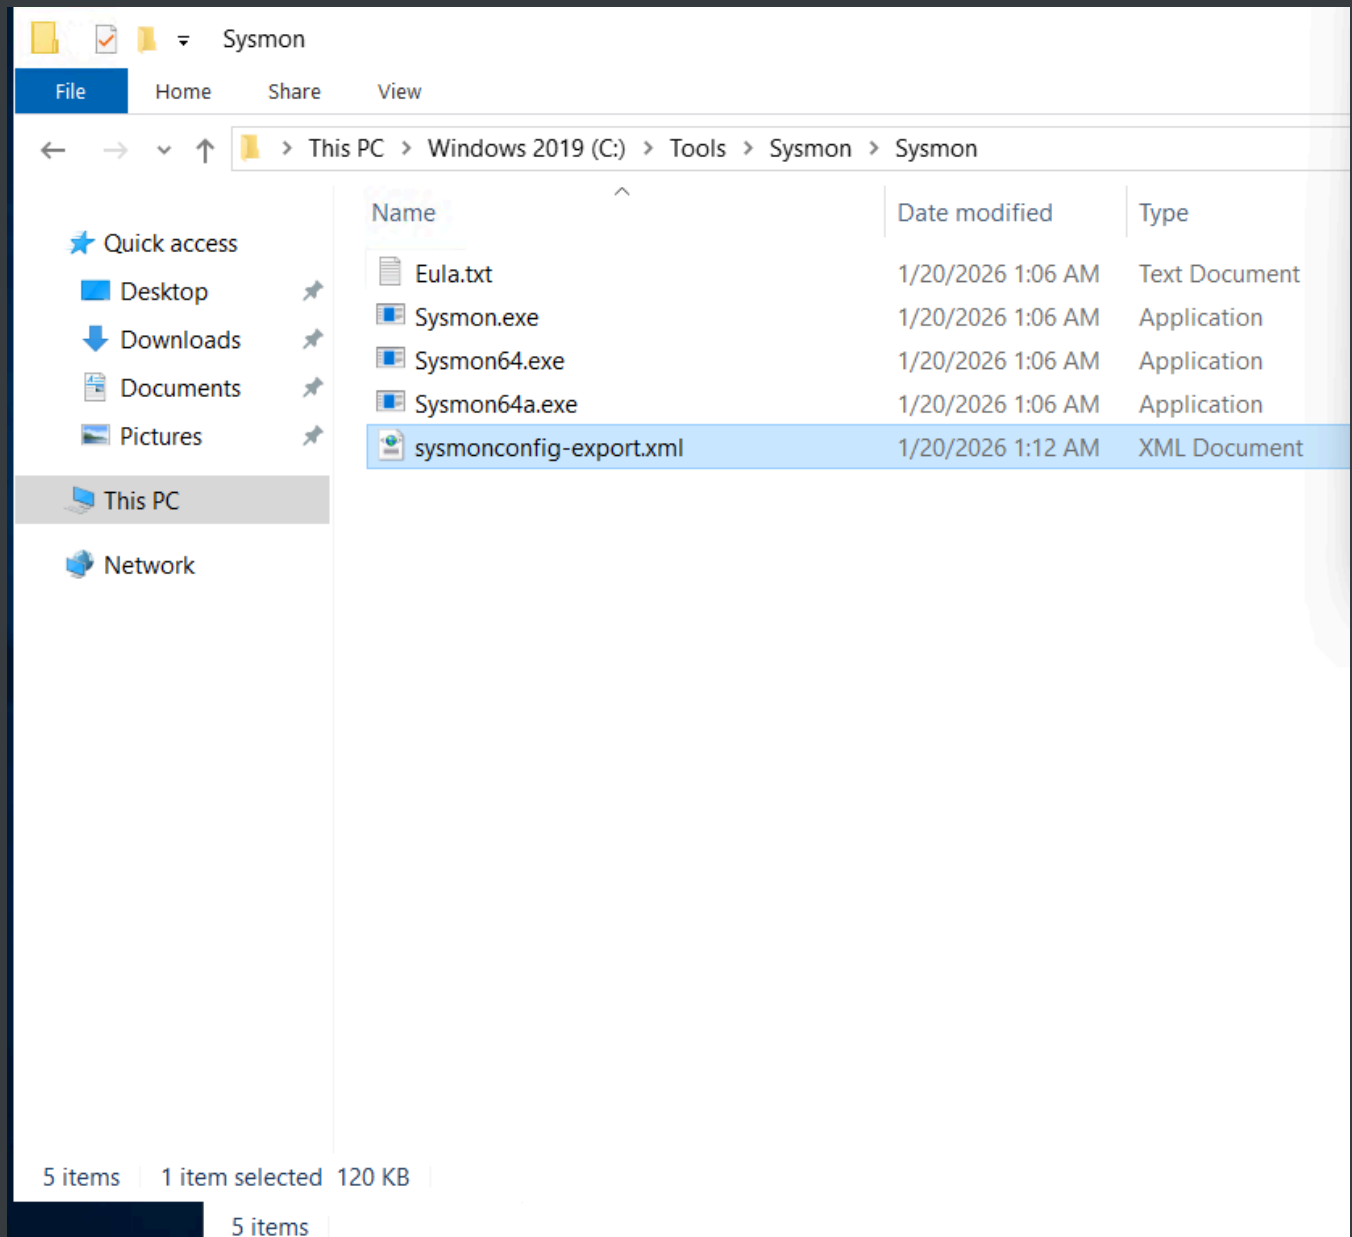

1200 lines (1120 loc) · 120 KB

Download raw file

Code Blame

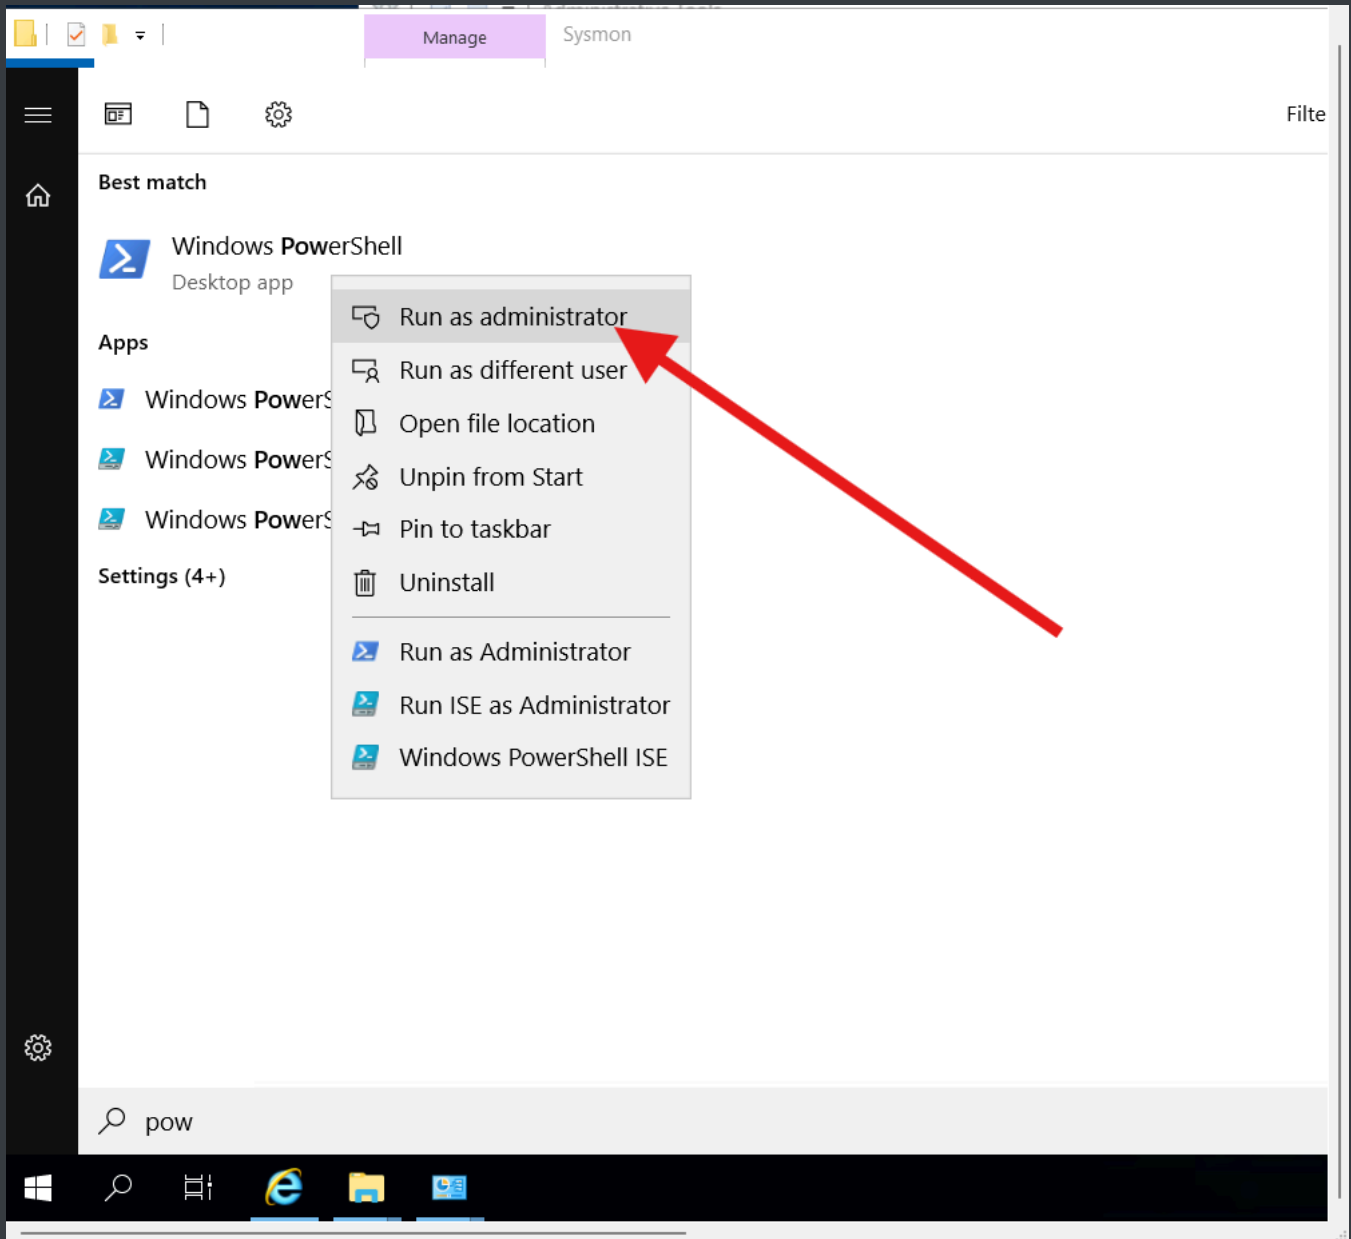

```
1 <!--
2 sysmon-config | A Sysmon configuration focused on default high-quality event tracing and easy customization by the commun

5 Source license: Creative Commons Attribution 4.0 | You may privatize, fork, edit, teach, publish, or deploy for commerc
6
7 Fork version: <N/A>
8 Fork author: <N/A>
9 Fork project: <N/A>
10 Fork license: <N/A>
11
12 REQUIRED: Sysmon version 13 or higher (due to changes in syntax and bug-fixes)
13 https://docs.microsoft.com/en-us/sysinternals/downloads/sysmon
14
```

Et on la met dans le même répertoire que Sysmon :

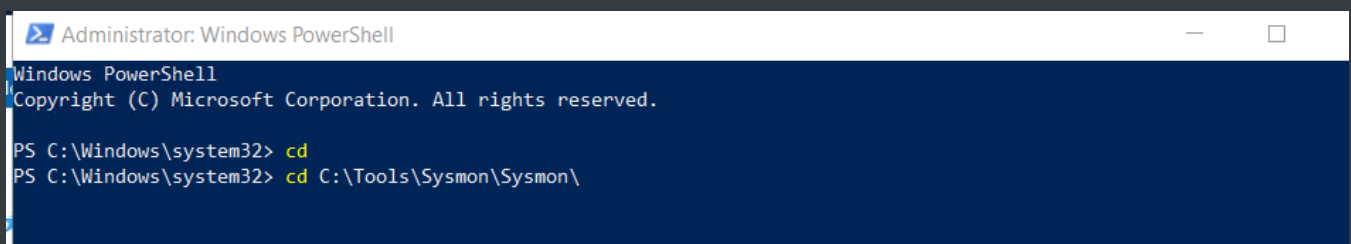

2/ Installation de Sysmon

On commence par ouvrir un CMD PowerShell en tant qu'administrateur :

Ensuite on va dans notre répertoire :

```
1 cd C:\Tools\Sysmon
```

Et ensuite on va taper la commande d'installation :

```
1 .\Sysmon64.exe -accepteula -i sysmonconfig-export.xml
```

```
PS C:\Windows\system32> cd
PS C:\Windows\system32> cd C:\Tools\Sysmon\Sysmon\
PS C:\Tools\Sysmon\Sysmon>
PS C:\Tools\Sysmon\Sysmon> .\Sysmon64.exe -accepteula -i sysmonconfig-export.xml

sysinternals - www.sysinternals.com

Loading configuration file with schema version 4.50
sysmon schema version: 4.90
Configuration file validated.
Sysmon64 installed.
SysmonDrv installed.
Starting SysmonDrv.
SysmonDrv started.
Starting Sysmon64..
Sysmon64 started.
PS C:\Tools\Sysmon\Sysmon> █
```

Tout est donc ici bien installé.

3/Vérification

Pour vérifier que le service est bien installé on tape la commande :

```
1 Get-Service sysmon64
```

```

Sysmon64 started.
PS C:\Tools\Sysmon\Sysmon> Get-Service Sysmon64

Status      Name            DisplayName
-----
Running     Sysmon64        Sysmon64

PS C:\Tools\Sysmon\Sysmon> █
```

L'indication running nous confirme que le service est bien installé et actif.

Ensuite on va vérifier qu'il y a bien des entrées logs par Sysmon avec le CMDlet :

```
1 Get-WinEvent -LogName "Microsoft-Windows-Sysmon/Operational" -MaxEvents 10
```

```
'S C:\Tools\Sysmon\Sysmon> Get-WinEvent -LogName "Microsoft-Windows-Sysmon/Operational" -MaxEvents 10
```

```
ProviderName: Microsoft-Windows-Sysmon
```

TimeCreated	Id	Level	DisplayName	Message
/20/2026 1:28:31 AM	22	Information		Dns query:...
/20/2026 1:25:02 AM	22	Information		Dns query:...
/20/2026 1:25:02 AM	22	Information		Dns query:...
/20/2026 1:25:01 AM	22	Information		Dns query:...
/20/2026 1:24:16 AM	22	Information		Dns query:...
/20/2026 1:23:30 AM	22	Information		Dns query:...
/20/2026 1:23:30 AM	22	Information		Dns query:...
/20/2026 1:23:30 AM	22	Information		Dns query:...
/20/2026 1:23:30 AM	22	Information		Dns query:...
/20/2026 1:23:27 AM	22	Information		Dns query:...

```
'S C:\Tools\Sysmon\Sysmon> █
```

La présence d'évènements nous confirme bien que le service fonctionne.

4/Test

Pour tester on va lancer un bloc notes avec :

```
1 notepad.exe
```

Et on va vérifier le journal de log :

```
PS C:\Tools\Sysmon\Sysmon> Get-WinEvent -LogName "Microsoft-Windows-Sysmon/Operational" -MaxEvents 10

ProviderName: Microsoft-Windows-Sysmon

TimeCreated          Id LevelDisplayName Message
-----
1/20/2026 1:47:58 AM      1 Information Process Create:...
1/20/2026 1:45:46 AM     22 Information Dns query:...
1/20/2026 1:45:45 AM      1 Information Process Create:...
1/20/2026 1:45:02 AM     22 Information Dns query:...
1/20/2026 1:45:01 AM     13 Information Registry value set:...
1/20/2026 1:43:03 AM     22 Information Dns query:...
1/20/2026 1:41:40 AM     13 Information Registry value set:...
1/20/2026 1:41:40 AM     13 Information Registry value set:...
1/20/2026 1:41:40 AM     13 Information Registry value set:...
1/20/2026 1:41:40 AM     13 Information Registry value set:...

PS C:\Tools\Sysmon\Sysmon>
```

On voit bien le message Process Create qui apparaît.
